GUARANT International, spol. s r.o.
Na Pankráci 17
140 21 Praha 4

What has the collaboration with Association House meant for the Czech Society of Otorhinolaryngology and Head and Neck Surgery? Reduction of administrative burdens, increased revenue, and facilitation of communication with members, suppliers, and partners of the company.

An important activity of Association House was analyzing and comparing the current member fees with other specialized companies. Despite the necessary increase in membership fees, we have managed not only to maintain but to increase the membership numbers.

The activity of the society with Association House raised interest in cooperation with a significant number of sponsors supporting both the company and its professional events.

Current projects with Association House participation include the support of young doctors under the age of 35 which allow our young colleagues to receive travel grants. Association House ensures all processing of documents and communication with grant applicants.

The ORL newsletter, which is now published regularly in electronic form, has been developed significantly. The ORL newsletter is distributed to all members of the company, partners and sponsors from a regularly updated database.

In summary, we see the partnership with Association House as a positive step forward.

prof. Viktor Chrobok, MD, PhD

President of the Czech Society of Otorhinolaryngology and Head and Neck Surgery
